## ABOUT ME

Software Engineer in training with experience in **large-scale technology companies** and participation in **international Agile/Scrum teams**. I have a solid foundation in **programming, data analysis, and artificial intelligence**, having developed applied projects in **processing, visualization, and deep learning models (CNN)**. In addition, I have experience as a **full-stack web and mobile developer**, which allows me to deliver **end-to-end solutions**, from data engineering to application and service implementation. I am **fluent in English (C1)**, as well as Spanish and Catalan (native).

## WORK EXPERIENCE

 **JUNIPER TRAVEL TECHNOLOGY** – PALMA DE MALLORCA, SPAIN  
**JUNIOR DEVELOPER INTERN** – 09/07/2024 – 09/08/2024

- **Software development and support**, with a focus on quality and scalability.
- **Troubleshooting** and participation in collaborative Agile projects.
- **Workflow optimization** in real development environments.

 **ERICSSON** – MADRID, SPAIN  
**SOFTWARE DEVELOPER INTERN** – 07/2025 – CURRENT

- **Collaboration within an international full-stack team under Agile/Scrum methodology.**
- Development of new features and bug fixing in production environments.
- Teamwork across multidisciplinary groups with exposure to corporate development practices.
- Direct experience in **continuous integration, version control, and deployment** within a large tech company.

## EDUCATION AND TRAINING

01/09/2023 – CURRENT Madrid, Spain  
**SOFTWARE ENGINEERING** U-Tad

- Background in **statistics, artificial intelligence, machine learning, and big data.**
- Academic projects in **ETL, predictive analysis, and data visualization.**
